

- Carpels, on the axial and ab-axial arrangement of, 186.
- Cells, on the circulation of the sap in the interior of, 1; on the development of, 17, 364.
- Cell-membrane of plants, observations on, 15; on the growth of, 145, 261.
- Cephalophus, on the species of, 162.
- Cetoniidæ, on the habits of various Indian species of, 469.
- Chaunax, characters of the new genus, 416.
- Cheirotonus Macleaii, description of the male of, 315.
- Chelonians, on the development of the, 316.
- Chlorophylle, on the development of, 193.
- Chondrus crispus, notice respecting, 186.
- Chordeiles, new species of, 118.
- Ciconia alba, notice respecting, 70.
- Cidaris, new species of, 357.
- Cinctosoma, new species of, 319.
- Circulation of the sap in the interior of cells, observations on, 1.
- Coal, on the vegetable tissues in, 67.
- Coleoptera, new British species of, 452.
- Composoma, new species of, 48.
- Corfu, on the natural history of, 294.
- Corollas, notes on the organogeny of, 132.
- Corvus collaris, notice respecting, 129.
- Corvus, new species of, 11.
- Corycæus, characters of the genus, 184.
- Corynactis, new species of, 394.
- Crocodyles, note upon two crania of, 361.
- Crustacea, new genera of, 176.
- Cryptocephalidæ, descriptions of new, 472.
- Cucullæa, new species of, 121.
- Cucurbitaceæ, on some points in the structure of the, 110.
- Cycas circinalis, structure of the trunk of, 358.
- Cyclopacea, on some genera of, 181.
- Cypræa, new species of, 54.
- Dana, J. D., observations on zoophytes, 155; on some genera of Cyclopacea, 181; on the classification of animals, 212.
- Davy, Dr., on the blood-corpuscles of some fishes and of a humming-bird, 56.
- Deinerosus, characters of the new genus, 179.
- Denny, H., on an extraordinary flight of butterflies, 133; on the elongation of the peduncle of Vallisneria spiralis, 425.
- Dewar, Dr., on the discovery of Luzula nivea, 425.
- Dinornis, on the osteology of the, 130.
- Dodo, on the osteology of the, 276.
- Doris, new British species of, 292.
- Doubleday, E., on some new or imperfectly described diurnal Lepidoptera, 371.
- Dorylus, on the habits of, 354.
- Drummond, Capt. H. M., list of the birds observed to winter in Macedonia, 10.
- Dunker's, Dr. W., Palæontographica, noticed, 272.
- Echinodermata, new species of fossil, 357.
- Eckhard, C., on the organization of the polygastric infusoria, 433.
- Edentata, on the relations of the, to the reptiles, 278.
- Edmondston, T., notice of the late, 138.
- Elaphomyces, new British species of, 81.
- Endogone, new British species of, 81.
- Entomological Society, proceedings of the, 352, 468.
- Entomostraca, observations on some, 181.
- Eolis, new British species of, 293.
- Ephippitytha, new species of, 468.
- Ephistemus, new British species of, 453.
- Equisetum, on the siliceous armour of, 191.
- Euchirus, characters of the genus, 183.
- Eucomatocera, characters of the genus, 49.
- Euprepis, new species of, 430.
- Eustochus, on the British species of, 54.
- Eutriche, new species of, 53.
- Evans, Mr., on some rare plants gathered in the neighbourhood of Edinburgh, 425.
- Evans, W. F., on a new species of grasshopper from New South Wales, 468.
- Falconer, Dr. H., on two crania of crocodiles, 361.
- Fasciolaria, new species of, 122.
- Felis, new species of, 211.
- Ferret, on the wound of the, 376.
- Fishes, on the size of the blood-corpuscles of some, 56; on the statics of, 69; descriptions of new, 416.
- Forbes, Prof. E., on the pulmograde Medusæ of the British seas, 284.
- Forster, Dr. T., on the migration of the swallows, 195.
- Fry, E., on the relation of the Edentata to the reptiles, 278.
- Fungi, notices of British hypogæous, 73.
- Fusus, new species of British, 246, 330.
- Galerites, new species of, 357.
- Gaskoin, J. S., on new species of Cypræa, 54.
- Gazella, new species of, 214.
- Gené, Prof., on the generation of Ixodes, 160.
- Genea, new British species of, 76.
- Geranium, on the medicinal properties of the British species of, 427.
- Gilbert, Mr. J., notice of the late, 414.

- Ginnania furcellata, observations on, 42.
 Glossiphonia, new species of, 390.
 Gonatocerus, new species of, 53.
 Golding, Mr., on the production of a queen bee from a neuter larva and on the impregnation of the queen, 476.
 Goniadactylus, new species of, 429.
 Gould, J., on new species of Trochilidæ, 129, 419; on new species of birds, 349, 418.
 Graham, Prof., biographical sketch of the late, 64.
 Grasshopper, new species of, 468.
 Gray, J. E., on a new family and genus of lizards from Columbia, 67; on a species of Hippopotamus from Sierra Leone, 136; on the species of Cephalophus, 162; on some new species of mammalia, 211; on two new species of Antelopes, 214; on the arrangement of the hollow-horned Ruminants, 227; on a new genus of sea-snake, 284; on the Kakapo and Macro of New Zealand, 427; on the genus Pedicularia, 428; on some new species of Indian lizards, 429; on a new species of Volute, 431.
 Gulliver, G., on the size of the blood-corpuscles of birds, 56.
 Haldeman, S. S., on Unio abacoides, 430.
 Halicarcinus, characters of the new genus, 178.
 Halichondria, new species of, 236, 475.
 Haliotis, new species of, 197.
 Halowell, Dr. E., on a new species of bat, 356.
 Hancock, A., on some new and rare British species of naked mollusca, 289; on some shells dredged on the west coast of Davis's Strait, 323.
 Harting, Prof., on the growth of cell-membrane, 145, 261.
 Harvey, Dr., on the capture of Ciconia alba, 70.
 Helix, new species of, 58, 123, 127.
 Helluodes, characters of the new genus, 354.
 Henfrey, A., on the development of vegetable cells, 364.
 Herrmannsen's, A. N., Indicis generum malacozoorum primordia, notice of, 274.
 Herpestes, new species of, 211.
 Hill, Mr. R., on the skull of an undescribed seal, 415.
 Hippopotamus, on a new species of, 136.
 Holoparamacus, observations on the genus, 352.
 Homoptera, new species of, 24.
 Horæ Zoologicæ, 114.
 Hydnotra, characters of the genus, 78.
 Hydroporus, new British species of, 453.
 Hymenogaster, new British species of, 74.
 Hypothyris, observations on the genus, 32.
 Hypotropis, new species of, 284.
 Infusoria, on the organization of, 433.
 Insects, new, 23, 47, 49, 315, 344, 352, 371, 452, 468; on the supposed sense of pain in, 353.
 Ireland, additions to the fauna of, 310, 383.
 Ixodes, on the generation of, 160.
 Jacchus, new species of, 212.
 Jardine, Sir W., on the ornithology of the island of Tobago, 114.
 Johnston's, A. K., Physical Atlas, notice of, 409.
 Johnston, Dr., on the medical properties of the British geraniums, 427; on a new British sponge, 475.
 Jonas, Dr. H., on some new species of shells, 121.
 Kenyon, Mr., on a Pyrola found in Lancashire, 426.
 King, W., on certain genera belonging to the class Palliobranchiata, 26, 83; on some shells and other invertebrate forms found on the coast of Northumberland and Durham, 233.
 Leaves, on the nectariferous glands of, 137.
 Le Conte, J., on a new species of Apus, 358.
 Leptæna, observations on the genus, 36.
 Libellulidæ, revision of the British, 217.
 Limapontia, new British species of, 289.
 Limosa, new species of, 419.
 Linnæan Society, proceedings of the, 186.
 Linyphia, new British species of, 301.
 Lisbon, on the vegetation in the neighbourhood of, 65.
 Lithoria, new species of, 345.
 Litus, on the British species of, 51.
 Lizards, on a new family of, 67; new species of, 429.
 Longchamps, Baron Edm. de Selys, on the British Libellulidæ, 217.
 Longicorn beetles, new species of, 47.
 Lowe, Rev. R. T., on a new genus of the family Lophidæ, 416.
 Lymanon, on the British species of, 51.
 Lyonsia, new species of, 338.
 MacLagan, Dr., on the plant yielding the drug Mudar of India, 425.
 Mammalia, new species of, 211.
 Mangelia, new species of, 202.
 Marginella, new species of, 466.
 Margarita, new species of, 324.
 Medusæ, on the development of the, 208; of the British seas, on the, 284.
 Melanospilus, new species of, 469.
 Meliphaga, new species of, 418.

- Menke's, M., Journal of Malacozology, noticed, 274.
- Meteorological observations, 71, 143, 215, 287, 359, 431.
- Meyer's, H. von, Palæontographica, noticed, 272.
- Miquel, Prof., on the structure of the trunk of *Cycas circinalis*, 358.
- Miracia, characters of the new genus, 185.
- Mocoa, new species of, 430.
- Mohl, on the circulation of sap in the interior of cells, 1; on the growth of cell-membrane, 145, 261.
- Mollusca, naked, notices of new and rare British species of, 289.
- Morphnus urubitinga, on the habits of, 116.
- Morton, S. G., on two new species of fossil Echinodermata, 357.
- Mulder, Prof., on the growth of cell-membrane, 145, 261.
- Müller, J., on the statics of fishes, 69.
- Mymaridæ, descriptions of the, 49.
- Newport, G., on the aqueous vapour, and on the dark colour of the wax in bee-hives, 190; on the generation of Aphides, 192.
- Nickerl, Dr., on the entomology of the Carinthian highlands, 339.
- Notaris, Gius. de, on *Ginnania furcellata*, 42.
- Nucula, new species of, 333.
- Nudibranchiata, new British species of, 292.
- Octaviana, new British species of, 76.
- Odontophorus, new species of, 351.
- Oidemia perspicillata, notice respecting the occurrence of, in Ireland, 368.
- Ooctonus, on the British species of, 50.
- Ornithomyiæ, on the embryogeny of the, 70.
- Orthoptera, new species of, 23.
- Otto's, M., figures of flowering Cactææ, noticed, 275.
- Owen, Prof., on the *Dinornis*, 130; on the skull and on the osteology of the foot of the Dodo, 276.
- Pachyphlæus, new British species of, 79.
- Palliobranchiata, remarks on certain genera belonging to the class, 26, 83.
- Panthus, on the British species of, 52.
- Papilio, new species of, 371.
- Paralystra, characters of the new genus, 25.
- Parry, F. J. S., on the male of *Cheirotonus MacLeai*, 315.
- Paussidæ, new species of, 469; habits of various Indian species of, 469.
- Pedicularia, observations on the genus, 428.
- Pentamerus, observations on the genus, 83.
- Peziza, descriptions of two new species of, 77.
- Pfeiffer, L., on new species of Helicea, 58, 123, 127; *Symbolæ ad historiam Heliceorum*, noticed, 273; Journal of Malacozology, noticed, 274; Figures of flowering Cactææ, noticed, 275.
- Philippi's Figures and descriptions of new or incompletely known shells, noticed, 273.
- Physeter tursio, notice respecting the occurrence of, in Ireland, 310.
- Physical Atlas, notice of the, 409.
- Pinnixa, characters of the new genus, 177.
- Plants, on the cell-membrane of, 15; on the regular arrangement of crystals in certain organs of, 82; on the absorbing powers of, 134; on some saccharine secretions of, 137; notices respecting the occurrence of rare British, 425.
- Platynodes, characters of the genus, 354.
- Plectodera, new species of, 48.
- Pleomorpha, characters of the genus, 472.
- Pæciloptera, new species of, 25.
- Polygastric infusoria, on the organization of the, 433.
- Polynema, on the British species of, 52.
- Portlock, Capt., notices in connexion with the natural history of Corfu and its vicinity, 294.
- Productus, observations on the genus, 40.
- Pteroglossus, new species of, 350.
- Pteromys, new species of, 211.
- Pteropus, new species of, 356.
- Pupa, new species of, 61.
- Quekett, E. J., on the regular arrangement of crystals in certain organs of plants, 82; on the development of starch and chlorophylle, 193.
- Ralph, T. S., on the axial and ab-axial arrangement of carpels, 186; on the structure of *Viola*, in connection with its impregnation, 196.
- Ramphastos, new species of, 350.
- Ransford's, Dr., notice of the late Prof. Graham, 64.
- Rathke, H., on the development of the Chelonians, 316.
- Reeve, L., on new species of *Cypræa*, 54; on new species of *Haliotis*, 197; on new species of *Mangelia*, 202.
- Reid, Dr., on the development of the *Medusæ*, 208.
- Reptiles, on the relations of the Edentata to the, 278.
- Retepora, new species of, 237.
- Rhizocarpeæ, on the fructification of the, 408.
- Rhizopogon, new British species of, 76.
- Riopa, new species of, 430.

- Ruminants, on the arrangement of the hollow-horned, 227.
 Salea, new species of, 429.
 Sarothrodera, characters of the genus, 47.
 Saunders, W. W., on the New Holland Cryptocephalidæ, 472.
 Schleiden, M. J., on the fructification of the Rhizocarpeæ, 408.
 Scribella, characters of the new genus, 183.
 Seal, account of the skull of an undescribed species of, 415.
 Setella, characters of the new genus, 182.
 Shells, new, 54, 58, 121, 197, 233, 323, 430, 431, 461.
 Siebold, M., on the organization of the polygastric infusoria, 433.
 Siliqua, new species of, 430.
 Sowerby, G. B., on new species of Brachiopoda, 461; on new species of Marginella, 466.
 Sphaerosoma, new British species of, 79.
 Spiders, new genera and species of, 179, 297.
 Sponge, on a new British, 475.
 Starch, on the development of, 193.
 Stocks, Dr. J. E., on some points in the structure of Cucurbitaceæ, 110.
 Strigocephalus, observations on the genus, 87.
 Strigops habroptilus, observations on, 427.
 Strophalosia, observations on the genus, 92.
 Strophomena, observations on the genus, 36.
 Styria, account of botanical excursions in, 94.
 Sundevall, C. J., on the birds of Calcutta, 102, 168, 251, 303, 397, 454.
 Swallows, on the migration of the, 195.
 Terebratula, observations on the genus, 32; new species of, 461.
 Theridion, new British species of, 302.
 Thomisus, new British species of, 297.
 Thompson, T. P., on a species of Hippopotamus, 136.
 Thompson, W., on the fauna of Ireland, 310, 383; on the occurrence of a Surf-Scoter, 369.
 Thwaites, G. H. K., on the cell-membrane of plants, 15.
 Townsend, F., on three species of Glyceria, 426.
 Tradescantia, on the circulation of the sap in, 7.
 Trevelyan, W. C., on the vegetation in the neighbourhood of Lisbon, 65.
 Trictenotoma, new species of, 353.
 Trochilidæ, new species of, 129, 419.
 Trogon, new species of, 349.
 Tuber, new British species of, 80.
 Unger, M., on the nectariferous glands of leaves, 137.
 Unio, new species of, 430.
 Venerupis, new species of, 122.
 Viola, on the structure of, 196.
 Voluta, new species of, 431.
 Walker, F., on the Mymaridæ, 49.
 Ward, Mr., on Uncaria procumbens, 193.
 Westwood, J. O., on the genus Holoparamecus, 352; on two new genera of Carabidæ, 354; on new species of Pausidæ, 469.
 White, A., on some new species of orthopterous and homopterous insects, 23; on new species of longicorn beetles, 47; on four new genera of Crustacea, 176; on a new genus of Arachnida, with notes on two other species of spiders, 179.
 Wilson, Dr. G., on the presence of fluorine in plants, 425.
 Wollaston, T. V., on three newly-discovered British species of Coleoptera, 452.
 Xanthasia, description of the new genus, 176.
 Xenophthalmus, characters of the new genus, 177.
 Zoological Society, proceedings of the, 54, 121, 197, 276, 349, 414, 461.
 Zoophytes, observations on, 155.

END OF THE EIGHTEENTH VOLUME.

PRINTED BY RICHARD AND JOHN E. TAYLOR,
 RED LION COURT, FLEET STREET.
